

A Poor Weak Woman

As she is termed, will endure bravely and patiently agonies which a strong man would give way under. The fact is women are more patient than they ought to be under such troubles.

Every woman ought to know that she may obtain the most experienced medical advice free of charge and in absolute confidence and privacy by writing to the World's Dispensary Medical Association, R. V. Pierce, M. D., President, Buffalo, N. Y. Dr. Pierce has been chief consulting physician of the Invalids' Hotel and Surgical Institute, of Buffalo, N. Y., for many years and has had a wider practical experience in the treatment of women's diseases than any other physician in this country. His medicines are world-famous for their astonishing efficacy.

The most perfect remedy ever devised for weak and delicate women is Dr. Pierce's Favorite Prescription.

IT MAKES WEAK WOMEN STRONG.

SICK WOMEN WELL.

The many and varied symptoms of woman's peculiar ailments are fully set forth in Plain English in the People's Medical Adviser (1008 pages), a newly revised and up-to-date Edition of which, cloth-bound, will be mailed free on receipt of 31 one-cent stamps to pay cost of mailing only. Address as above.

MAY RAISE PERRY'S FLAGSHIP

Niagara in Good Condition After Century Under Water

The flagship Niagara, that led the American fleet under Commodore Oliver Hazard Perry to victory in the battle of Lake Erie, Sept. 10, 1813, after the first flagship Lawrence had been shot to pieces and abandoned, will be raised and rebuilt.

The hull of the vessel, lying in 20 feet of water in Misery Bay, an arm of Presque Isle Bay, better known as the Erie Harbor, was thoroughly examined this afternoon by Dan Claflin, a diver from Toledo, Ohio, under the supervision of A. Q. Thatcher of the Thatcher Contracting Company of Toledo and Milton W. Shreve, Speaker of the Pennsylvania State Legislature.

Diver Claflin spent about three hours going over every part of the abandoned hull. He reported that the flagship was in good condition. He brought up spikes, made of hand hammered iron, that had been under the water almost a century. — New York Sun.

The State Normal School, Warrensburg, Missouri.

This school is better equipped than ever before to meet the need of every class of students.

It offers a Rural School Certificate course to graduates of rural schools, Elective courses for graduates of four year high schools, an Advanced Professional courses for graduates of colleges and universities preparing to be teachers.

It gives excellent opportunities for vocational training. While the purpose is primarily to train teachers, it gives that preparation necessary for life work in any calling.

The expenses are lower than in any other school of equal rank. This is the only normal school in the Middle West that furnishes virtually free text books.

The Fall Quarter begins September 10th.

For catalog or other information, address

President W. J. Hawkins.

The Warrensburg School more than maintained its good record this summer. The enrollment reached 1248. More than eighty per cent of those in attendance were teachers or will be teachers this year. The influence of this great body of teachers in Missouri will be immeasurable.

No better proof of the superior work done in this school can be given than the following statement from the catalogue of the State University of Missouri. "Arrangements have been made with the South District State Normal School at Warrensburg whereby graduates of that school in the four year Normal Courses will be admitted to junior standing in the College of Arts and Science and School of Education in this University."

Mrs. George Green of Mayview visited friends in Lexington last week.

Mrs. E. B. Campbell and daughter, Vera Mae, returned Thursday from a few days' stay in Kansas City.

PERSONALS

Ed Aull went to Kansas City Friday on business.

O. M. Elliott went to Kansas City Friday on business.

Wm. Aull went to Higginsville Friday night on business.

Thomas Malter went to Kansas City Saturday on business.

Gustav Drumm went to Kansas City Saturday for a few days' visit.

Joseph Scarlett returned Friday from a visit in Breckenridge, Mo.

G. B. Silverman of Kansas City spent Thursday in Lexington on business.

J. C. Shelton returned Friday night from a trip to Kansas City and Topeka, Kansas.

Mr. and Mrs. T. D. Hammond of Mayview were in Lexington Friday to attend the Chautauqua.

Mrs. J. C. Graddy returned Friday evening from an extended visit with her parents in Shelbyville, Mo.

Mrs. Geo. Stier returned to her home in Kansas City Thursday evening after a visit with Mrs. J. R. Moorehead.

Jackson Price went to St. Louis Thursday, where he has been transferred to the office of the Wells Fargo Express company.

ADMINISTRATOR'S NOTICE.

In
Silos—

Do
Not
Fail
To
See
Us

We Have A New Idea That Builds A

Perfect Ensilage Preserver at the Least Cost of Construction and the Most Substantial Wood Building that can be Erected

The farmer knows that the silo utilizes all the feed value of farm crops and makes feeding a matter of two hours light work instead of a day of dreudrigy hauling feed.

One acre good corn equals 10 tons silage.
Ten tons silage feeds three head cattle 6 months.
One acre in silo is worth about 3 in the crib.
One ton silage occupies 50 cu. ft.
One ton hay occupies 500 cu. ft.

It will be seen that ten times more space is required for hay than silage and it is not possible to construct even a cheap hay shed, to say nothing of a barn, for the price required to store the same quantity of silage.

The question is what kind of a silo to build. We recommend the Common Sense method of silo construction because:
It is within the means of the smallest feeder, as the height is not fixed and it can be added to from year to year as the herd increases.
The walls are substantial and can not collapse.
No hoops to tighten.
No braces necessary.
Will not shrink or buckle.

It is so simple to construct that anyone can build it.
No door expense. Doors are cut out of the solid section of wall and beveled, making them practical, simple and air tight.
This silo is built with 6, 7, 8, 9 or 10 sides and is made of 2x4's—6 ft. laid like brick flatwise, and lined with acid-proof prepared roofing, making it absolutely air tight.

Come in and Investigate. Secure License to build
